When your order a website, we will teach you how to use it because we want you to feel comfortable with the technology we provide you.

But Pixarts also regularly organizes courses and seminar to teach open source technologies, SEO, marketing and adwords. We can also come to your company to teach your people, thus to increase the performance of your website and your company.

Example of formations given by Pixarts:

- Setting up a website using the CMS Joomla!
- How to optimize a Webpage for search engine
- What key words do you need for your business
