Pixarts is specialized in website design. Our graphic designers can propose a corporate identity, a logo and, of course the corresponding web site design.

Web design do not have to be underestimated. In fact the design of your website is the first impression that your customer will get about your company. A good design will also help you to improve your page rank and your [Search Engine Optimization](#) . In fact, the design is visual but also includes the code design of the page.

We can resume the design process by the following steps:

- Initial meeting in order to understand better your domain of activities
- Research to understand better your domain of activities
- Logos proposition
- After your approval design of templates
- Choice and approval
- Coding of the template according to the latest web standards
