Pixarts' development team is specialized in the creation of web applications. We create modules, plugins and components for the most known CMS Joomla! that satisfy the specific needs of our clients. We use a new innovative framework called Imhotep for particularly complex web applications.

Our team is specialized with the following technologies:

- PhP
- Zend Framework
- Symfony
- Imhotep
- Doctrine
- Javascript
- JQuery
- Ext
- CSS, Html,...

We are used to create presentation website, e-commerce website, and we, of course, can create a website that will suit your specific needs.

For our header, we use the library JQuery and an excellent plugin [Jparallax](#)
